Seize the Day

YASUNARI
KAWABATA

But, drawn to her at that moment, he
the voice of the rain flow over him. he
enough that for her it was in fact no
but somehow the final determination
the effect of distilling and purifying
existence.

Thank you
FOR YOUR PURCHASE
HERE IS HOW TO USE
TUTORIAL FOR BOTH
CANVA AND PHOTOSHOP

If you want to download more templates like this
visit: <https://creativemarket.com/septemberfifth>

CANVA TUTORIAL

NOTE:

To edit the templates on mobile devices you will need to open the designs on the desktop version first and make a copy to your folder before you will be able to use on the mobile devices (*such as iPhone and iPad*).

MAKE A COPY FIRST

Do not edit the original template, save a copy of your own!
To do so, click **File > Make a Copy** and the templates will be copied in
'All your designs'. From there you can rename the designs
and start editing.

Original template is used by number of costumers so always Make a Copy.
Any changes you make without making a copy are going to be public
so always make sure you made a copy before start using it.

STEP 1 - PREPARE

Make sure you already have a Canva account. <https://www.canva.com> IT'S FREE!
This template works for both free and pro Canva user

STEP 2 - EDIT

Customize templates to match your brand. To do so, place your own image and texts and also change the background colors and text color as needed.

STEP 3 - SAVE

To export your finished designs click 'Download' in the top right corner.
You'll be able to select the file format, and the pages you wish to export.

HOW TO UPLOAD & PLACE YOUR IMAGES

You'll need to upload your images to Canva when you open the templates.

To do so, go to the section 'Uploads' in the left sidebar and click on 'Upload and image' or simply drag and drop the photos on the tab.

Simply drag them to the image box set up in the templates from the Canva left sidebar to replace the images. When the photo is released it will fill in the frame. By double-clicking on it, you can move the image inside the frame and then slide the image to modify the positioning and zoom. To replace a photo simply drop the new one over the current one.

HOW TO EDIT TEXTS

Editing Canva texts is very easy, just double-click on the text box and type in your own text. The Canva interface enables you to easily change the font, select colors, edit size & spacing. Please note that with Canva's free version you can only use their pre-selected free fonts. To use a custom font, you may need to upgrade to Canva's Premium version.

IF TEMPLATES LOOK BROKEN AND UNTIDY

If the design templates seem to be altered or broken for some reason, please let us know via CreativeMarket's direct message or email.

PHOTOSHOP TUTORIAL

NOTE:

Adobe Photoshop CS3 or newer version is required to open these files correctly and allow for full editing.

DOWNLOAD USED FONTS

Download and install fonts
before opening photoshop files

Links:

DM Sans

<https://fonts.google.com/specimen/DM+Sans>

Gilda Display

<https://fonts.google.com/specimen/Gilda+Display>

Cormorant

<https://fonts.google.com/specimen/Cormorant>

IBM Plex Sans

<https://fonts.google.com/specimen/IBM+Plex+Sans>

Lora

<https://fonts.google.com/specimen/Lora>

Quentin

<https://www.dafont.com/quentin-2.font>

STEP 1

Open PSD file in Adobe Photoshop. To place your own image into smart object, double click on the thumbnail of the “PLACE YOUR IMAGE HERE” layer.

STEP 2

After your double click there will be another window called Layer#.psb opened. This is the place you paste your own image.

STEP 3

After placed your image in the window make sure you Save your changes (ctrl+s or cmd+s) and close it. That's it. Your creative design is ready to go.
